e4pectanc& 3hile l&ing unused in stoc). \(\) tems 'alued at 75..9 million 3 ere not found during ph&sical 'erification in three field missions. There 3 as e'identl& a need for closer lin) age bet 3 een ac/uisition planning and procurement of e/uipment and their deplo&ment.

#trategic Deplo&ment #toc) (#D#! 3 as set up in ,++, to facilitate /uic) start?up of ne 3 missions. This in ol'es both timel& procurement of items as 3 ell as turno'er of stoc)s to ensure that the items in stoc) remain contemporar&. As at *+ June ,+-., there 3 ere *,:89 items 'alued at 75:.+: million in the #D# in entor&. @o3e'er, .. per cent of the items in #D# 3 ere more than a &ear old. These items included %CT e/uipment 'alued at 7*.*9 million, 3 hich 3 ere prone to obsolescence 3 ithin a short span of time. A total of .9< items 'alued at 75.*9 million had alread& e4ceeded their useful life.

Administrati'e instructions states that all tra'el arrangements for indi'iduals including ad'ance boo)ing and purchase of tic)ets should be finali ed -: calendar da&s in ad'ance of commencement of official tra'el. The o'erall e4tent of non?compliance decreased from ., per cent in ,+-*6-5 to 58 per cent in ,+-56-.. @o3e'er, non?compliance increased in some missions. A number of cases of non?adherence to the polic& 3ere related to tra'el for conducting inter'ie3s, attending meetings and carr&ing out e'aluations6inspections that could ha'e been planned in ad'ance.

=eace)eeping operations incurred an e4penditure of 79.+.<, million on air transportation during ,+-56-. 3hich 3as ,: per cent of the total e4penditure of 7,.85 billion under operational costs. Aircraft 3ere not utili ed b& the missions for more than .- per cent of the contracted da&s and there remained a persistent mismatch bet3een a allable flight hours and those actuall& re/uired or utili ed b& missions.

The primar& purpose of the #trategic Air Operations Centre is to ma)e strategic and out of mission flights efficient, cost effecti'e and responsi'e to operational needs b& ta)ing into account the comple4ities, specificities and operational conditions of each mission. This objecti'e remained unfulfilled as it failed to carr& out either pre?flight or post?flight anal&sis of the bul) of strategic or out of mission flights.

M% (U#MA and MO (U#CO had introduced Unmanned Aerial 1 ehicle #&stems for reconnaissance purposes. The a'erage utili ation ranged from eight to 55 per cent of the estimated utili ation per month. 0i'en the e4perience gained and)eeping in 'ie3 the actual utili ation rates, there appeared to be scope for optimi ation of the number of s&stems leased to reduce costs 3 ithout compromising operational re/uirements.

The "oard continued to note instances of de'iations from bid re/uirements or established tendering processes, lac) of competiti'e bidding, non?le'& of li/uidated damages, non?adherence to pro'isions relating to performance bonds and deficient contract management. =rompt pa&ment discount amounting to 7.,5,:9+ could not be a'ailed of under contracts for fuel, rations and other items due to dela&s in processing of in'oices and claims.

The Administration has achie'ed substantial progress in 'arious components of global field support strateg& o'er the fi'e &ears of its implementation period till June ,+-.. @o3e'er, the end state 'ision for each pillar of global field support strateg& 3 as not full& achie'ed. B hile the Administration did face challenges in implementing 'arious facets of global field support strateg& arising from competing operational demands, it should ha'e been possible for Administration to coordinate, prioriti e and plan its acti'ities more effecti'el& focusing on a clearer demonstration of ho3 the essential oblecti'es of global field support strateg& 3 ere achie'ed and to better demonstrate the benefits accrued to all sta)eholders. The "oard highlighted the follo3ing>

Though go'ernance and performance management 3 ere identified as)e& elements that 3 ere to be established at the beginning of the global field support strateg& period, the end state 'ision and the)e& performance indicators 3 ere introduced in the second and third &ear of implementation. Articulation of the end state 'ision and a plan for implementation of global field support strateg& at the initial stage of the implementation period)ous (a)4(t)4('e)4()2500(f)3(i)-(c)4(c)-2(l)-2(e)4:

Despite the "oard;s pre'ious recommendation, no steps 3 ere initiated to either re?constitute the Resource 2fficienc& 0 roup or charge another bod& to discharge the function of identif&ing and follo3 ing through on identified efficiencies.

\$e& elements of the human resources pillar li)e 3 or) force planning, succession management, filling up of 'acancies and a monitoring and accountabilit& frame 3 or) 3 ere &et to be achie 'ed.

There 3 ere also dela&s in ta)ing for 3 ard the suppl& chain management pillar and in de'eloping enabling capacities.

The Administration had stated that the implementation of global field support strateg& up to ,+-*6-5 had resulted in net sa'ings of 75,5..- million. "oard found that some of the reported figures 3 ere onl& estimates based on budget and could not be construed as actual reali ed benefits. Curthermore, there 3 ere instances in 3 hich the Administration 3 as not able to pro'ide brea)?do3n or documentation in support of those costs or benefits including amounts that ha'e been reported to the 0 eneral Assembl&. Conse/uentl&, the "oard 3 as unable to obtain sufficient e'idence to full& 'alidate the claims made b& the Administration.

The "oard recogni es that 3 hile the benefits of a business transformation strateg& such as global field support strateg& ma& be both tangible and intangible, a benefit reali ation plan must capture the actual costs and reali ed benefits based on an objecti'e and consistent methodolog& that can be empiricall& established.

The "oard continued its e4amination of deplo&ment and utili ation of %CT resources in peace)eeping operations and highlighted the follo 3 ing>

There 3 ere -:*,88: number of %CT assets 3 ith purchase 'alue of 7:*<.5< million. The life e4pectanc& has been fi4ed as four &ears for information technolog& assets and se'en &ears for communication assets. A total of .+,.9* %CT assets (*- per cent! 'alued at 7,5* million had e4ceeded the life e4pectanc&. A large number of %CT assets 3 ere unutili ed or l&ing idle.

Despite the pre'ious recommendations of the "oard, Mar)et research or cost benefit anal&sis had not been either underta)en or documented in respect of an& of -. %CT standards, ne 3 l& formulated or e4tended during ,+-56-..

Disaster Reco'er& and "usiness Continuit& =lans that 3 ere scheduled to be re'ie3ed in October,+-* 3 ere &et to be re'ie3ed and updated.

٠

#&stematic and periodic 'ulnerabilit& assessments are essential to identif& securit& threats to information securit& s&stems in an organi ation. Cour of the si4 missions re'ie3ed 3ere not a3are of c&ber securit& penetration testing ha'ing been performed\(^1\) and

Details of training and a 3 areness programmes on %CT securit& conducted during ,+-56-. 3 ere not a 'ailable.

"ased on its findings, the "oard has made a number of recommendations aimed at redressing the 3ea)nesses identified and for impro'ing go'ernance and financial management of the Organi ation.

Mr. Chairman and Distinguished Delegates, this concludes m& statement. M& Colleagues and % 3 ill be a 'ailable to respond to the Committee / uestions during the informal sessions of the Committee.
