

- The WCO

From 2013 to 2018, the work on Customs systems intercorrectivity progressed under the leadership of the WCO and ECOWAS and under Côte divoire's EU funded Programme d'Appui au Commerce et à l'integration Régionale (PACIR). This project made available expertise and financial resources for the elaboration of functional and technical specifications for transit intercorrectivity and involved Côte d'Ivoire, Burkina Faso, Mali and Senegal.
