

Denmark's statement at the UN Food Systems Summit

Denmark has a national binding target to reduce food waste across all parts of the food value chain. Thereby supporting the Sustainable Development Goal 12.3 of reaching an overall reduction of food loss and food waste by 50 percent. To reach this vision, the Danish government has established a think tank that brings together stakeholders.

Regarding healthy and sustainable diets, our vision is that the majority of consumers enjoy nutritious meals by applying climate-friendly dietary guidelines.

On reduction of antimicrobial resistance, our vision is prudent and reduced use of antimicrobials in animals. The "One Health" approach is crucial.

We have also established the International Centre for Antimicrobial Resistance Solutions (ICARS).

On deforestation-free value chains

We already support the "School Meals Coalition" and will engage actively in the "Healthy Diets Coalition" with a focus on climate-friendly dietary guidelines. We also support the coalition on "Food is Never Waste". And last but not least, we have joined the Agriculture Innovation Mission for Climate.

Thank you.
