interoperability. The more quality datasets you have access to, and the easier it is for them to talk to each other, the more potential value you can get from them. Commonl y- agreed data standardehe drurrh 1.4 3(u)-oar p 1 p the padd

Define clear objectives in transparency and open data policies. It is key to make opening plans, taking into account current regulations, demand, resources, etc. In this way, when planning, risks can be identified and if there is personal or reserved infor mation, it can be treated to avoid publishing data that does not correspond, and to be able to publish the rest of the information with the necessary precautions. Planning ahead is important to identify risks, prevent and mitigate them.

Apply data protection techniques. Regarding personal data, there are anonymization guides to be able to open data protecting private and/or sensitive information.

Coordination within the UN itself on who is handling the topics (multiple agencies
